

European Landmarks Card Game

Instructions

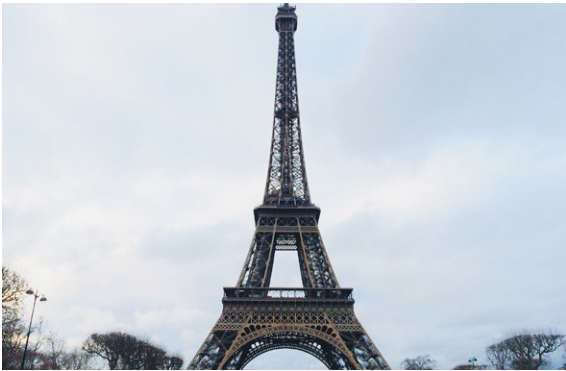

Create double-sided cards by folding along the dotted line and gluing or laminating each card together. Children can play individually or in small groups. Spread cards out picture side up. Children begin by turning over the go card and reading the name of the landmark on the other side. They then look at the pictures on the other cards and turn over the one that matches. Children continue turning over the matching card until they find the stop sign. If they discover the stop sign before they have turned over all the pictures, then they have made a mistake and must start again.
